CAREER TRACKS

Law Enforcement Professional Program

Introduction to Criminal Justice

The Introduction to Criminal Justice course explores the intricacies of the American Criminal Justice system – past, present and future. Within the confines of the Constitution, this explores the criminal justice system as it is developed by state criminal codes and served by so many levels of personnel from police officers on the street to the attorneys, judges and investigators that comprise its inner-workings. Throughout this course, students will examine police methods and crime statistics as well as following the process all the way through from incident, to arrest, to court adjudication and corrections. Students will discover how laws are criminal laws are created, how the court system enforces them, and how the American criminal justice system has evolved over the last 2 centuries.

Criminal Investigation

This course teaches students the fundamentals of criminal investigation by examining the processes involved in identifying and arresting criminal suspects, identifying the types of crimes and offenses, and preparing for court. Students will be introduced to the various techniques for interviewing witnesses, suspects and other stakeholders as well as the components of successful investigations. The course reviews a number of investigative practices in tracking down and apprehending suspects in preparation for criminal cases. Further, the Criminal Investigation course offers an intricate understanding of the science and art of criminal investigation, the gathering and analysis of evidence and the overall management of major cases.

Criminal Justice Ethics

Ethical considerations pose constant questions for criminal justice professionals, judges, elected officials and society as a whole. As a measure of our progress, ideals and principles as a society, the criminal justice system is one of the most important elements of any civilization. It is in that light, that the Criminal Justice Ethics course addresses the various dynamics of ethical behavior, ethical application of the laws and ethical incarceration guidelines including capital punishment and controversial federal sentencing guidelines. Focusing on the philosophical issues and moral dilemmas within the field of criminal justice, this course takes a critical look at the principles of justice, deontology and utilitarianism as well as the various players within the system. Overall, this course looks at the ethical dilemmas and professional problems faced by criminal justice personnel and the overall society they represent – a society that includes both accused and convicted criminals.

Introduction to Policing

Considering a career in law enforcement? Interested in the criminal justice system as a whole? This course offers students a window into the fascinating and difficult work of policing American cities from street to street. To give students the most in-depth look at policing possible, this course examines the history, structure, actions and strategies of American police. Students will explore a number of interesting topics including the structure and purpose of federal, state and local police forces, their inner-workings and interconnectivity as well as the various ways each individual force plays a role in the collective effort to keep American cities and streets safe. This course gives students an overview of the police and their mission. It examines the evolution of policing as well as methods, issues, and challenges to present-day policing.

Police Techniques

The requirements of all elements of law enforcement grow more and more technical every day. With new techniques developing all the time that include more sophisticated analysis, problem solving and advanced technology applications alongside in-depth community relations, police techniques are more complex than ever before. Police work requires a constant commitment to new methods of crime prevention and mitigation alongside a broad understanding of sociology, public health, and the overall administration of justice. In studying both traditional and new techniques in this field, students will have the opportunity to review various case studies to apply their own analysis and knowledge, ensuring they leave with realistic expectations for this career choice and the further community training required.

Criminal Law & Procedure

This course deals with both substantive criminal law and the legal procedures that govern its enforcement in order to safeguard individual liberties. Numerous crimes such as homicide, theft, and conspiracy make up state and federal penal statutes by which the state prosecutes individuals for actions we've collectively decided are not acceptable to civil society. Likewise, Criminal Law also addresses the various defenses available to individuals accused of committing such crimes such as self-defense and insanity and the way in which these defenses can be applied. This course provides the student with the basic principles and history of American criminal law, the elements of specific crimes, the procedures of the criminal justice process, and the constitutional rights of the accused.

MS Office

The Microsoft Office course introduces students to the standard business applications that most professional and academic entities use. Students will master computer basics including Windows, word processing, spreadsheets, data processing, graphics, internet, and email applications. From there, students will also learn how to transfer data from one application to another, what uses this capability has as applied to typical work functions. Having a basic mastery of the entire MS Office suite ensures you know how to navigate through the major programs and also interact between them to increase overall productivity even more.
